Intuitive Control

Hi

New Neets Configuration Utility software release

Neets is ready with a new release of the Neets configuration utility software. In the upgraded version we have joint all our control systems (*Neets Control – DK, Neets Control – QueBec, Neets Control – FoXtrot, Neets Control – EU Standard and Neets Control – EU Professional*) to make it easy and intuitive. This means that you will use the same software, no matter what control system your project requires.

In this upgraded version we have implemented a help desk, so when in doubt press F1. In the help desk you will be able to find the information you need on programming Neets control systems. Furthermore we have made some new features, for example; It is now possible to change the order of the sequences on the button – (to do this before required delete of button and start over). Neets approved device drivers will be shown as tested under the port assign, and for the Neets Control – DK, it is now possible to send Volume commands without turning on the panel.

The new release is available [here](#).

Neets Control – QueBec ready in stock

At the ISE 2008 we launched our newest control system – the Neets Control – QueBec. The control system is already available in stock and we have shipped the first systems.

Neets Control - QueBec is an intuitive and straight forward projector control system. All you need to do is plug the Neets Control - QueBec to the stationary computer, turn the computer on and the projector will start. You are ready for your presentation within minutes.

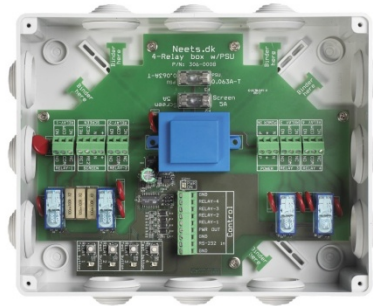

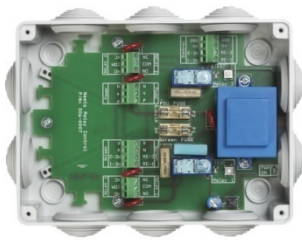

What happens is that, when turning on the PC the Neets Control – QueBec detects the VGA signal from the PC, loops it thru and turns on the projector. The system is unique in its layout. Unlike the other control systems in Neets product portfolio, the Neets Control - QueBec has no buttons. Though small and straight forward the system controls 1 RS-232, 1 IR, 1 input and 2 outputs

Neets Control – QueBec, item number 310-0010

New relay boxes in stock

Our new 2- and 4-relay boxes are now available in stock. With the new relay boxes you get both relays and power supply for the Neets control systems. Furthermore you get an easy installation and a nice finish. We have made the relay boxes easy to handle with direct screen control, test buttons and rubber grommets. Finally the 4-relay box can be controlled via RS-232. **With the new relay boxes our 2-relay box item number 306-0010 will no longer be available.**

306-0007 2-relay box with PSU

306-0008 4-relay box with PSU
