

News May 2007

Hi

Summer is on its way and so are Neets with new products.

- New products – input panel and USB-Switch
- Summer holiday

New products – input panel and USB-Switch

This spring Neets has developed some new products.

- DK- Input panels with USB port
- USB-Switch

DK – Input panel with USB port

Neets has developed a new input panel with an USB port. The input panel makes it possible to connect an USB pin directly in the wall, which gives a very nice finish. The input panel can be used with the USB-Switch (see below).

The DK – Input panel with USB port can be ordered now and are available for delivery from June 15 th.

Please go to www.neets.dk and order item number 305-0065 on the webshop

USB-Switch

Several schools and companies have the new interactive boards installed and these are often connected to one computer. In cases where a teacher brings his material on a laptop, it can be problematic to connect the interactive board to the computer used. This problem is now solved with Neets USB-Switch. Neets USB-Switch gives you the possibility to switch between two computers USB output (from the central computer and the laptop) to the same interactive board. The advantage with Neets USB-Switch is when you use a Neets control system you avoid installing software and you control the

switch from the Neets control system. Neets USB-Switch can be mounted in a cable canal and are equipped with a mounting plate, which makes it very easy to mount. Neets USB-Switch is user friendly when you use more than one computer on the interactive board and it can be installed so it won't be visible.

USB-Switch can be ordered now and are available for delivery from June 15 th.

Please go to www.neets.dk and order item number 306-0004 in the webshop.

Summer holiday

Neets will be closed for the summer from the 16 th. of July to the 30 th. of July – week **29** and **30**.

We wish you all a nice and hot summer

Best regards

Neets
