

Hello

Here is some news from Neets.

- **New firmware for Neets Control - EU version 1.63**
- **New software version 2.1.3**
- **RSS Feed from Neets**
- **ISE 2009**

### **New firmware for Neets Control – EU version 1.63**

We have made a new version of firmware for Neets Control – EU 1.63 where the following has been changed:

- When using a control sequence on the same button as a volume sequence, the key release is now registered by the system.
- When using a control sequence on the same button as a volume sequence, the control sequences was send when the key was pressed and when it was released. This has now been corrected, the sequence is send when the key is pressed.

### **New software version 2.1.3**

A new version of the Neets Configuration Utility software is now available and we have made some changes from the previous version. We discovered that in some Windows themes the color on some of the control was wrong – this has now been fixed.

It is now possible to select a LAN port as a primary connection and IR learn using the UNI IR Learner (PN# 302-0008). If the comport you have selected to connect your UNI IR Learner is not in the list, a new port will be selected. If the UNI IR Learner is sometimes sending garbage data when powering on, this data is ignored.

When IR learning with the UNI IR Learner in intelligent mode, the timeout is set to 100 ms. Previously when you tried to set up the UNI IR Learner in direct mode, the program failed when an error occurred while opening the port, this is now corrected.

When retrieving a project/device from a Neets Control - EU panel the continues volume repeat time is now accurate (previously it was reduced with a factor 100). Finally the comport list is updated with all ports after software start.

Both the newest firmware and software is available under **Neets update** under Help in the software.

### **RSS Feed from Neets**

Neets is now published at RSS. We will now send out all our news big and small as a RSS Feed. You will read about new products, events and the like - we hope you enjoy.

You can take the Feed by using this [RSS link](#)

### **ISE 2009**

It is now able to register for the ISE 2009 – FREE of charge. Just use this [registration link](#) and you will be guided thru the registration.

Neets will be exhibiting at ISE 2009 with a bigger booth and new product releases. You will find us in hall 5, booth 5091. We look forward to welcoming you at the biggest Audio Visual show in Europe – the Integrated Systems Europe 2009.

If you have any comments or questions please do not hesitate to contact us at [sales@neets.dk](mailto:sales@neets.dk) or by phone: +45 75 666 099

Best regards

**Neets**
