Time Control

Professional projector and plasma screen control

Neets

Neets Time Control is a software programme for projectors and plasma screens. The Neets Time Control is an intelligent programme that controls your projector/plasma screen (power on/off and source select), so you can relax and be sure that the projector/plasma screen shows exactly what you want and when you want it. Additionally, it can start any of your Windows programmes or files on your computer (e.g. Power Point or an avi movie) and show it on the projector/plasma screen.

The **Neets Time Control** is fully controllable via your browser and therefore you can actually control it at a distance by internet or intranet.

The **Neets Time Control** is an economical system, leaving it up to you when to turn on/off your projector. If used correctly, the Neets Time Control will cut down expenses for both electricity and lamps.

The **Neets Time Control** is very useful for many purposes. For instance:

- Plasma screen welcoming customers in your shop
- Schedule presentations in the hall at schools
- Commercials in the window of shops

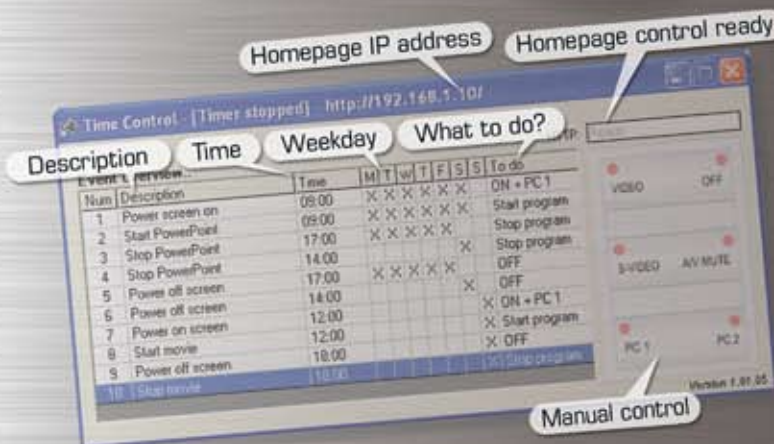

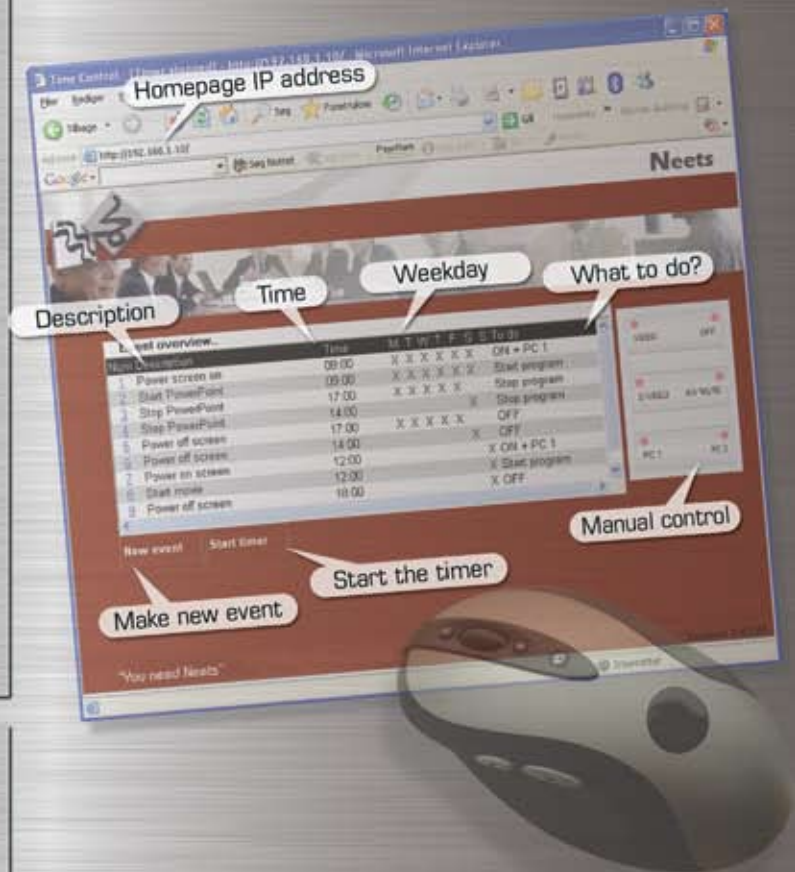

Versions of the Neets Time Control:

1. Neets Time Control Standard

- Handles as much as 20 events at a time

2. Neets Time Control Professional

- Handles as much as 1000 events at a time
- Homepage control
- LAN Control of projector/plasma screen
