

Hi

Greetings from everybody at Neets.

Neets Serial Splitter ready to order

We are proud to announce that we are ready with our newest product - Neets Serial Splitter 1-4. The serial splitter gives you the possibility to easy and electronically correct distribute one RS-232 signal to four identical receivers e.g. projector, LCD or Plasma screens.

Imagine a presentation room with four identical plasma screens or four identical projectors – these devices can now be controlled from a Neets Control system via the Neets Serial splitter 1-4. If you need to control more than one relay box this can also be done via the Serial Splitter 1-4.

If your project requires the control of *more* than four devices this is also a possibility. Just add another Neets Serial splitter 1-4 to one of the output ports on the first Neets Serial splitter. The new serial splitter is ready for orders now, and will be ready for delivery mitt December 2007.

You can read more about and order the Serial Splitter [here](#).

Neets at ISE

Integrated Systems Europe 2008 will be even better than the previous years for Neets. We will be ready with new as well as upgraded products and - as the previous years - you don't want to miss out.

This year we will be placed in booth **E109 in hall 3 - Westhal.**

**Integrated
Systems
Europe**

To make it even easier for you we have made it possible to register free of charge (normal admission fee € 40) right [here](#). Please use invitation code **905457**. When registering here you will receive a badge which you must bring to ISE 2008. The badge entitles free access to ISE 2008 on all show-dates.

We look forward to welcoming you at the biggest Audio Visual Show in Europe.

Best regards

Neets
