Intuitive Control

Hi

Summer is comming and so is Neets with som good news..

Updated version of Neets Configuration Utility software

Neets is ready with version 2.1.0. in our configuration utility software.

With the new software you will be able to generate and print your project documentation. Furthermore you can, in connection to finding bugs when communicating with the panels, be able to test the RS-232 ports on the computer.

We have also made the check sums more flexible when controlling volume on RS-232 or LAN. You now have the ability to decide, what bytes you want to use in your calculation, and where the result is placed. Furthermore we have added more ways on calculating the check sum. These updates mean that it now is possible to control volume on e.g. a NEC screen.

Also the Neets Control - QueBec has got the ability to detect even smaller drop outs – down to 20 milli seconds – in the VGA signal.

If you need support Neets now offers to "take over" your PC. This makes the support even better and faster. Furthermore we have made an online FAQ with direct access from the software.

Last, but absolutely not least, we have tripled the number of device drivers.

The new version 2.1.0 can be downloaded [here](#).

USB to RS-232 Converter

To secure the most optimum programming of Neets control systems Neets now offers a **USB to RS-232 Converter**, which converts the RS-232 signal to USB signal. With the converter you also get a test dongle which you can use to test if the port works. The converter is verified by Neets when programming Neets control systems and secure an easy and intuitive programming.

Sales- and marketing material

Neets currently updates new sales- and marketing material on our web site. The newest is our **Pocket reference book**, a handy folder, which gives you an extensive overview on Neets products and some Key and Unique Selling Points. You will also find our new **Product catalogue** and a **Sales power point presentation**. You can see the sales- and marketing material [here](#). If you need some specific sales- or marketing material you are more than welcome to contact us at sales@neets.dk.

National holiday

Do to national holiday Neets will be closed Thursday and Friday, May 1th and 2th.

Best regards

Neets
