

When I need 16 buttons, is it then the Master/slave function I need to use?

Regarding products:

307-0002: Control systems

When I need 16 buttons, is it then the Master slave function I need to use?

No, to get a control system with 16 buttons you need the Neets Control – EU Professional. The Neets Control – EU Professional gives you the possibility to hitch 2 keyboards – each with 8 buttons). (You only need the Master/slave function in projects where you need more than one control unit. E.g. one unit by the screen and one by the door in the other end of the room).

Best Regards

Neets
